

574F Ritchie Hwy #248 · Severna Park, MD 21146 · www.esipfed.org

Hello,

We are very pleased to offer you complimentary registration for the upcoming [ESIP Meeting](#) because you have never been to an Earth Science Information Partners (ESIP) Meeting in the past and you have been identified as an important expert to speak in and/or attend a breakout session. You may coordinate with the session organizer who has reached out to you. On behalf of ESIP, I would like to thank you for your interest in participating and share a few more details about the meeting and about ESIP more broadly. Please let me know if you have any questions.

Registration: Full meeting [registration](#) is complimentary for you. Please register within three days of receiving this notification. When registering, use discount code SpeakerJAN24 (case sensitive). Federal employees will need to verify that they can accept this comp registration. Although you have been invited to participate in a certain session, we hope you will join as much of the full ESIP meeting as you can. The meeting will be held virtually January 23-26. You can check out the full agenda at <https://2024januaryesipmeeting.sched.com/>.

Meeting Goals & Theme: For more than 25 years, ESIP meetings have brought together the most innovative thinkers and leaders around Earth observation data, thus forming a community dedicated to making Earth observations more discoverable, accessible and useful to researchers, practitioners, policy makers, and the public. The theme for this meeting will be "*Grounded in Trust - Data Ethics Empower Collaboration.*"

Audience: ESIP, which is funded by NASA, NOAA, and the USGS, is a community of practice for professionals across sectors working on technical, Earth science data-related topics. We are asking our speakers to keep their presentations "high level" but technical to reach a broad audience of professionals across Earth science data and informatics. The organizer of the session you will participate in can provide further guidance on who will be in the virtual room.

If you would like to know more about ESIP, please check out this one-pager: <https://www.esipfed.org/onepager>. A much longer, but very informative read is the [2022 ESIP Annual Report](#). Please let me know if you have any questions about the meeting or about plugging into the ESIP Community. Thank you again for your upcoming contributions.

Patty Allen
